

DISCFLO

UpTime Pumping

Grit · Scum · Clarifier Underflow
BFP / Centrifuge Feed · WAS · RAS
Lime Slurry · Lime Sludge

DISCFLO Pumps with their unique principle of **Boundary Layer & Viscous Drag** keeps all your processes up and running.

UpTime Service

As opposed to downtime which costs time and money for our end users

Extremely Long Life Expectancy

Typically 20 years in the municipal market, as opposed to 1-2 years between rebuilds with the competitive pumps

Non-Clogging

Eliminates downtime for cleaning out (unplugging) the competitive pumps that plug up.

Life Cycle Costs (LCC)

Are the lowest for the abrasive and abrasive/viscous pumping application typical of water and wastewater pumping applications.
